The above signifies the consensus opinion of what WXDU DJs thought were the best new releases during the Spring Semester. Playlist airplay was monitored for the period 01 January to 22 April 1987 in an attempt to make the subjective objective: most played/requested = most popular/"best." The above listed are the cream of the crop of the some 350 new releases that were featured during the semester. The oldest and most recent releases will post somewhat lower than expected due to their partial overlap with time period. What a fine semester it was! Here's to an equally fine Summer and Fall 1987!
